Installation Instructions

Contents of ACC-2006 Diamond Plate Floor Cover:

- a (1 ea.) Upper Floor Cover (top of photo)
- b (1 ea.) Lower Floor Cover (bottom of photo)
- c (2 ea.) #10 x 1.5" Self Tapping Screws
- d (4 ea.) #10 x 1.0" Self Tapping Screws

Caution: Please read through the instructions carefully. Look behind each drill location BEFORE YOU DRILL. Installer is responsible for damage (i.e. drilling into a wiring harness, battery, fuel tank etc.).

Installation Preparation

1. Remove Driver and Passenger Sill Plates. Retain the hardware.
2. Remove existing Floor Cover by lifting it from the bottom of the cart, over the pedals and out of the side channels.
3. Clear any debris from the flooring.

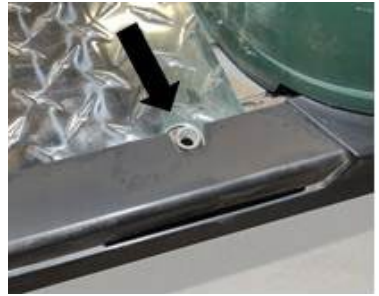

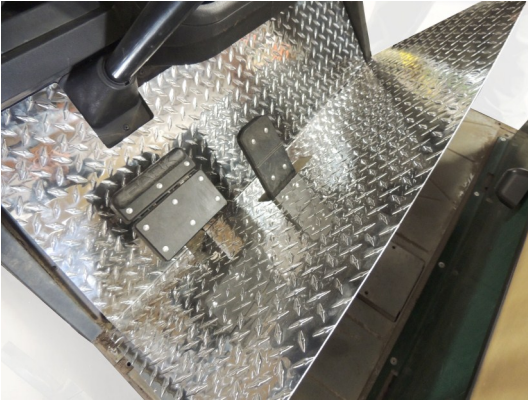

Diamond Plate Floor Board Installation

1. Identify the Upper Floor Cover. Align the Upper Floor Cover so the bend in the diamond plate is at the bottom. Slide the Upper Floor Cover, bottom first, over the pedals.
2. Push the side edges of the Upper Floor Cover into the existing side channels for a snug fit.

3. Identify the Lower Floor Cover. Align the Lower Floor Cover so the cut-out is over the accelerator pedal.
4. Completely lower the Floor Cover. The Lower Floor Cover will rest on the lip of the Upper Floor Cover. The shorter sides of the Lower Floor Cover will sit under the lip of the Rocker Panels. The (4) small notches will align with the Sill Plate mounting holes.

Note: Slightly moving the Rocker Panels out of the way may make this step easier.

5. Re-align Rocker Panels if needed.
6. Reinstall Sill Plates using hardware retained from the installation preparation.
7. Use (2) #10 x 1.0" Self Tapping Screws to fasten the Upper Floor Cover at the top two corners.
8. Use (2) #10 x 1.0" Self Tapping Screws to fasten the Lower Floor Cover at the two corners closest to the seat.
9. Use (2) #10 x 1.5" Self Tapping Screws to fasten the middle seam between the Upper and Lower Floor Covers. Space screws evenly.

This completes the installation of your E-Z-Go TXT Diamond Plate Floor Cover. Please enjoy safely!
